ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2002

The SPEAKER pro tempore. Pursuant to House Resolution 180 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2311.

□ 1352

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2311) making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes, with Mr. SIMPSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from Alabama (Mr. CALLAHAN) and the gentleman from Indiana (Mr. VISCLOSKEY) each will control 30 minutes.

The Chair recognizes the gentleman from Alabama (Mr. CALLAHAN).

Mr. CALLAHAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is my privilege to bring before the body today the fiscal year 2002 appropriations bill for energy and water needs facing this country. We have tried desperately to work with all the Members on both sides of the aisle to bring before you today a fair bill, a bill that has addressed most of the concerns of the Members who have contacted us. Mr. Chairman, there have been extensive contacts with us. In our deliberations we have come forward with a bill that I think provides the administration with ample funds for energy and water and reclamation needs in this country.

The bill agrees with President Bush that we should constrain government growth. I am happy to report that this bill constrains government growth because it is only increased about a one-half of 1 percent over the FY year 2001 level of funding.

The total funding in H.R. 2311 is \$23.7 billion. This is \$147 million, as I said, less than one-half of 1 percent, more than fiscal year 2001, for energy and water development programs.

Title I of the bill provides funding for the civil works program of the Corps of Engineers. The Subcommittee on Energy and Water Development is unanimous in its belief that these programs are among the most valuable within the subcommittee's jurisdiction. The national benefits of projects for flood control, for navigation and shoreline protection substantially exceed project costs. The bill acknowledges the importance of water infrastructure by funding the civil works program at \$4.47 billion, an increase of only \$568 million over last year's appropriation.

Within the amount appropriated to the Corps of Engineers, \$163 million is for general investigations, \$1.67 billion is for the construction program, and \$1.86 billion is for operations and maintenance. In addition, the bill includes \$347 million for the flood control, Mississippi River and Tributaries project. The bill also funds the budget request for the regulatory program and the Formerly Utilized Sites Remedial Action Program.

In title II, which is for the Bureau of Reclamation, we spend \$842 million, an increase of only \$26 million over fiscal year 2001.

Title III provides \$18 billion for the Department of Energy, an increase of \$444 million over fiscal year 2001.

So in all three areas of jurisdiction the bill is within the suggested constraints that President Bush has submitted to us, whereby we control excessive government growth spending. We are very pleased to have done that.

We sought to maintain level funding for basic research in science programs;
